

It is about time the FCC pays attention lo the people instead of special interest groups. This may come as a shock to you in Government, but we (the people) really enjoy our 1st amendment rights. It is our choice wheather to listen to xm radio, or to try and listen to other radio. Because other radio stations donot want competition , they want the FCC to pass laws restricting our First amendment rights.It is outragious if not illeagle for you to even entertain such a law. It is about time the Government gets a back bone and tell these sissys to suck it up or get out of the business.
